Mines and Mining Stocks

ARTHUR BUCKBEE

Salt Lake Operator and Miner Lands a Fine Property

MONTREAL OPERATORS ASSOCI-

after a couple of months of hard work, he has succeeded in landing one of the most eligible and favorably located gold propositions in the state of Montana. Mr. Buckbee has been acting for himself and Buckbee has been acting for himself and Montreal operators with whom he has been associated for the past six years, and he expresses himself as being highly pleased as the result of his labors. The property consists of the well known Sunlight group of claims and the Ohio or Mineral Hill group, adjoining, and which, including milisites, etc., embraces more than 1,100 acres of ground. The mines are located about three miles north of Whitehall, on the Butte and Gallatin railroad, the distance from the railroad line being

hall, on the Butte and Gallatin railroad, the distance from the railroad line being only two miles. One and one-half miles from the mines, on the north fork of Jefferson river, is located the milling plant that goes with the Sunlight property. This is to be remodeled at once to include the cyanide process and the production of gold, Mr. Buckbee states, will begin within ninety days.

The property is one that is already pretly well developed, but for several years nothing but the high-grade ores have been touched, as the proposition was worked by leasers exclusively. Several years ago George H. Robinson made a most favorable report upon the property, while at a later date Bernard McDonald, of Butte, and other well-known engineers passed favorably upon the mines, which finally favorably upon the mines, which finally passed into possession of the Searles company, of New York, which paid \$165,000 of the \$500,000 purchase price, worked it awhile at a good profit and then failed to carry out the terms of the agreement made and allowed it to again revert to its owners, John B. Welcome, Eugene Ring and A. J. McKay, who closed the deal with Mr. Buckbee on the first of the

present month. The properties are all patented and Mr Buckbee's thorough examination of the mines leaves no doubt in his mind that the ground can be made to yield handsome returns with comparatively little work and expenditure of money.

At any rate, he and his associates have

At any rate, he and his associates have decided to go ahead and the campaign of development at the mines and the remodeling of the mill has already been undertaken by Mr. Buckbee, who states that, within a short time, he will be treating ore that will run from \$7 to \$12 to the ton in gold, without counting at all any of the that will run from \$7 to \$12 to the ton in gold, without counting at all any of the high-grade ore which must result from the continued development of the ground. At depth, Mr. Buckbee expects, when the sulphide zone has been penetrated, copper wall play an important part in the product of the properties, but before that zone is reached there is a fortune to be cleaned up from the handling of the great masses of gold ore.

masses of gold ore.

It is understood that Mr. Buckbee has his eye on something in this region, but he was not willing to talk about it yesterday. During the past five or six years Mr. Buckbee has been in Salt Lake but little, though this city is his home and every mining operator and miner who has been for says length of time knows. been here for any length of time knows and is known by him.

GRAND VICTOR CROWD **GETS NEWS OF STRIKE**

Officials of the Grand Victor company operating at Tenabo, Lander county, Ne come news from Superintendent Charles
Varian that a fine strike had been made
in the Standard ground leased from the
Gold Quartz company. At a depth of
sixty-five feet in the shaft being sunk on
that ground two feet of sulphide ore has
been opened up that gives promise of been opened up that gives promise of making into something really sensational, because the sulphides have been caught at about half the depth at which they were expected to come in. Several inches of the ore, Mr. Varian shows by the assays made, carries 32 per cent lead, 54 ounces silver and \$3.10 in gold per ton, while the balance of the vein averages in the metals named \$24 per ton.

DOINGS OF UNLISTED STOCKS ON EXCHANGE

Nearly a dozen of the unlisted stocks participated in the trading yesterday. Copper Glance did business at 19c to 19½c, and its friends declare it is going a great deal higher, not on account of any "deal," but because it is intrinsically worth several times what it is now bringing. Bingham Standard was sold at 57c, East Tintic at 16c, Emma Copper at 17c, East Crown Point at 7c, Honerine at 30c and 25c, Mason Valley at \$2, Naildriver at 40c, Ohio Copper at \$5. Ohio-Kentucky at \$3.40 and Copper at \$6, Ohio-Kentucky at \$3.40 and Western Nevada Copper at 74c. Federal-Ely was quoted at 70@74c, New Stockton at 40@45c and Talisman at 40

LATE TIPS ON THE PRICE OF COPPER IN MARKET

Quoting the Boston News Bureau the

Pollock private wires brought the follow-ing tips on the copper metal market yes-"Fifty tons of electrolytic copper have just been sold for shipment this month to a domestic consumer at 24% per pound. There is inquiry in the market for additional later. tional lots.
"The Calumet and Hecla company is now selling its lake copper to European consumers at 23 cents per pound, and is prepared to sell buyers in this country at this figure."

MINING STOCK EXCHANGE. QTD

Crimp Is Taken in Some of the Leaders During the Day.

TREAL OPERATORS ASSOCIATED ACTOR ASSOCIATED WITH HIM.

Whether it was because Jesse Knight was quoted as saying that stocks were too high or whether it was due to the market being too heavy, the fact remains that some of the Knight stocks and other favorites on the local exchange were bumped a little during the day. Business was heavy, though, and there were plenty of buyers ready to take advantage of every break to load up with the stocks singled out for slaughter. Beck Tunnel and Crown Point were the worst sufferers. The former sold down from \$2.55 to \$2.27½, with over 9,000 shares ehanging hands. Crown Point was started at \$1 and dropped to \$6c. As a sort of stand-off for the action of these two stocks, Iron Blossom was boosted from \$1.25 to \$1.42½, while Sloux Consolidated was jumped up from 55c to 68c a share. The rest of the market behaved pretty well.

During the two regular and open board Arthur Buckbee, the well-known mining and mill expert and mining operator of this city, is down from Butte where,

New Hammocks

at last year's prices. This means a saving of 25 per cent to you. A Hammock fills a long felt want at home or out camping. Some people take them out to the lake. No summer complete without one. New and select designs.

King Hardware & Stove Co. 168 MAIN STREET.

(Special to The Herald.) American Fork, July 9.-Considerable excitement was caused here yesterday over the reported strike in the Golden Cup mining claim, at the head of Fort canyon, above Alpine. Samuel McCauly of Alpine, has been working this claim off and on for the past five years, and has always had a great deal of faith in strik-ing something rich some time. He has opened up a large body of ore which as-says \$7.14 in lead, silver and gold. He states there is at the least calculation fifty carloads of the ore at present block-ed out, and that he has thousands of tons of a good milling grade.

of a good milling grade.

Mr. McCauly has always said that he would some day surprise the natives in this district with what he would uncover up there, and it looks very much like he is going to make good. The ore is in a good handy place to get out and it is the intention of Mr. McCauly and his associates to immediately and his associated as a second and his associated and his associated as a second as a second as a second as a second and his associated as a second as a ciates to immediately begin shipping.

There is no question that this strike will awaken an interest in the near vicinity and that a great many more claims adjoining will be staked out and development work commenced. Some exceedingly rich float has been found in that vicinity and thousands of dollars have been

JESSE KNIGHT'S TALK

Provo, July 9.-A typographical error in the interview with Jesse Knight in to-day's paper makes him say "nor that there was a chance of the Big Eastern vein, east of the Beck Tunnel vein, making ore in the ground of the American claim," etc. "Nor" should be read "but," and the sense Mr. Knight wished to convey will be expressed.

A quit claim deed from H. C. Brownlee

A quit claim deed from H. C. Brownlee, Ida L. Brownlee and P. R. Kingdon, of Salt Lake, to the Mountain Lake Mining company has been filed with the county recorder. The deed conveys for \$4.000 the rights of the grantors in the following mining claims in American Fork mining district: Big Dan, Ida L., P. R. K., Ellen, Roceo, June Bug and the Walker B. in Big Cottonwood district.

John Roundy has conveyed to the Colorado Mining company the Vermont mining claim in the Tintic district, consideration \$1.

COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, a feature that has just been added by James A. Pollock & Co. to its private wire service, and from which it is secured for use in this department of The Herald.

Boston, July 9 .- Our Mr. Foster says: Boston, July 9.—Our Mr. Foster says:
"I firmly believe that coppers are on a better basis now than for a long time Calumet & Hecla is selling copper freely at 23c and the Metal Selling company and Phelps, Dodge & Co. have reduced electrolytic to 22c, and it is only a question of large

YERINGTON PREPARING FOR COMING BOOM

Fred A. Flindt, who is over from Yerington for a few days on personal business, says the district is getting ready for the boom that is just as sure to hit that country this fall as it is sure that summer is here. Denials to the contrary, he declares there is no question but that the famous Bluestone property, belonging to Captain J. R. Dellamar, is being thoroughly experted by the engineers of F. A. Heinze.

Whether a deal for the property will be Whether a deal for the property will be closed or not he does not presume to ven-

ture a guess, but he says the whole camp would be glad to see the Heinze combination get in there and, if the price named on the ground is right, the impression is that a sale will be made. It is all nonsense, Mr. Flindt says, to talk about \$10,000,000 or \$12,000,000 for the property, as the press reports have had it, though there is no question but that the mine is an exceedingly valuable one. And a new tunnel is now tapping the ore bodies at enough additional depth to add, probably, another 1,000,000 tons or more to the ores

enough additional depth to add, probably, another 1,000,000 tons or more to the ores already blocked out.

Mr. Flindt also reports that the recent strike in the Wheeler Gold company's property is holding out well and the prospects now are that the strike will prove more important than 'ts most enthusiastic champions expected of it. There is over three feet of ore in as true a ledge as could possibly exist, that Mr. Flindt says will average all of \$150 a ton, to say the least. This shoot has been driven through for a distance of something like seventy feet at a depth of 250 feet below the surface, and that in itself means a great deal.

The Mason Valley, Malachite, Western

Fire Ore Body.

The Mason Valley, Malachite, Western Nevada Copper and other properties are now all making splendid progress with development and the camp generally is growing bigger, richer and better every minute.

YAMPA IS MINING IN UTAH CON. GROUND

Notwithstanding seven years of Montana copper war over the United States law of the apex, there are still plenty of people in the mining and financial world, as well as in the world of financial journalism, who haven't the first comprehension of the law of apex, says the Boston News

of the law of apex, says the Boston News Bureau.

Therefore it may be timely to restate that whoever has by prior right of discovery under the United States mining laws the apex or top of a mining lode, whether it apexes above or underground, is entitled, if his surface claim has the prior date, to follow that ore body, with all its dips, spurs and angles between the end lines of his claim, outside of the side lines of his claim, and under the property or of his claim, and under the property or mines or lines of any person in existence to the end of the earth. In other words, he owns that mining claim, as far as the ore goes, whether to the north or south

Now the Boston News Bureau known for more than five years the deli-cate relations existing between the Yampa and Utah Consolidated, but as the Utah Consolidated people were interested in the Yampa and there was ground enough for both, there was no necessity for explaining the situation especially as there were possibilities that these two properties

might be put together.

When, years afterward, these two properties are still operating independently, and are approaching a collision in values and the insiders are selling Utah stock at high prices to New England investors, unaware of the situation, the Boston News Bureau makes further investigation and develops all the facts that can be developed up to the present time in the veloped up to the present time in the

The Boston Herald has recently published a letter with comment thereon which shows that neither the writer of the letter nor the publisher thereof, has any true conception of the law of anex be cause the letter and the comment both declare that as the Utah surrounds the Yam-pa, the Utah company can mine on all sides of it, which is an absurdity under United States patent laws. It cost the Amalgamated Copper company more than \$40,000,000 to get this situation clearly in

We will now add another fact concerning Utah which has never before appeared in print, and we do it because it is material to the situation, and has just arrived. The people who think they know a mining fault or a news fault are again invited to display their phosphorescence by collision We quote from our source of informa-

"The Yampa company has been and is now taking out ore from one of the claims owned by the Utah Consolidated company with the full knowledge of the management of the latter.'

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$55,000, as follows: Silver, lead, gold and copper ores, \$15,000; base bullion, \$40,000.

Metal Markets. Silver, 67%c per ounce. Copper (casting), 21%c per pound. Copper (cathodes), 22c per pound. Lead, \$5.45 per 100 pounds.

Mining Notes.

Ten cars of ore from Utah mines wer released from the Pioneer sampler yester The Taylor & Brunton sampler yesterday reported the release of ten cars of ore from Utah, five from Idaho, two from Nevada and one from California mines. Stock of the Mason Valley Mining com-pany was listed and called on the New York curb for the first time on Monday. It was started off at close to \$2 a share and was held at that price yesterday, according to New York advices.

Since the first of June the American Smelting & Refining company has cut the price of lead 55c per 100 pounds—that is, the company has lowered the settling basis with the producer that much. Yet there is nothing to show that the metal is any more plentiful than it was a month

or six months ago.

David Spritz, the Cincinnati broker, who is rounding up some of the camps of this region, was with Alex. Colbath and John T. Hodson on their trip to Alta T. Hodson on their trip to Alta. He went with them through the Columbus Consolidated and South Columbus properties and returned to the city a most surprised individual. He is getting so fascinated with the mines of this region that the folks at home had better send for him pretty soon or he will not want to go
